Professional Summary

Software Engineering student with a high level of motivation and a passion for developing innovative software solutions for real-world challenges by applying cutting-edge technologies. I am a quick learner and team player and am committed to continuously enhancing skills in emerging technologies. Having lived and studied in Bahrain and Australia and worked in India, I thrive in multicultural environments and adapt quickly to diverse work cultures.

Education

Bachelor of Software Engineering

Feb 2022 – Nov 2025

RMIT University, Melbourne

Skills

Programming Languages: Python, JavaScript, TypeScript, Java, C/C++, C#

Web Development: ReactJS, NextJS, Django, HTML, CSS, Bootstrap, SpringBoot, Javalin, Tailwind

Databases: MySQL, SQLite3, DynamoDB, PostgreSQL

Cloud & DevOps: AWS (EC2, S3, Lambda, DynamoDB, Beanstalk, ECR), Docker, Nginx, Apache

Tools & Methodologies: Git, GitHub, REST APIs, Agile, OAuth2, CI/CD, Unit Testing, Axios, JWT

Data Analysis and Machine Learning: NumPy, Pandas, TensorFlow, Neural Networks

Experience

Data Engineering Intern

Jul 2024 – Jun 2025

IITM Pravartak Technologies Foundation, Chennai, India

- Assisted in designing a **scalable system architecture** to integrate modern identity protocols like **OAuth 2.0, OpenID Connect (OIDC), and SAML**.
- Collaborated with an **Agile development team**, actively participating in sprint planning, stand-ups, and retrospectives.
- Used **Jira** to track tasks, manage workflows, and ensure timely project delivery.
- Contributed to the development of a **custom database system** by extending **PostgreSQL**.
- Implemented **security enhancements** using **C, Linux, and Pluggable Authentication Modules (PAM)** to strengthen authentication and access control.
- Engineered a **PAM module to authenticate and cache OAuth2 access tokens**, minimizing repeated authentication requests and enhancing system efficiency. **Improved authentication response time** by reducing redundant verifications.
- Acquired deep expertise with **database internals, system programming and distributed systems**.

Projects

Spotify Player - VS Code Extension. <https://github.com/Vidyut01/Vscode-Spotify-Player>

- A VS Code extension that integrates with Spotify, allowing users to control playback, search, and play tracks directly within VS Code.

- Integrated Spotify Developer REST APIs to fetch and display user data and control their playback.
- Incorporated a React based frontend that displays as a WebView in VS Code.
- Implemented OAuth2 authentication for secure user authorisation.
- Acquired deep knowledge in VS Code extension development and WebView integration.
- **Tools and languages used: TypeScript, ReactJS, REST APIs, OAuth2, VS Code API.**

SUPERPRICE: SpringBoot and React grocery shopping web app. <https://github.com/Vidyut03/Superprice>

- A fully featured grocery shopping web application with a responsive frontend, a RESTful backend, and a MySQL database.
- Led a team of 5, adhering to Scrum and Agile methodologies, completed three sprints successfully within two months.
- Constructed a Java-based backend utilising the SpringBoot framework.
- Crafted a TypeScript and React frontend, incorporating Bootstrap.
- Developed REST API endpoints for seamless communication between frontend and backend, managing API calls with Axios.
- Gained proficiency in Scrum methodology and technical protocols and cultivated teamwork and leadership skills through collaborative project development
- **Tools and languages used: Java, TypeScript, SpringBoot, ReactJS, Bootstrap, REST APIs, Docker, AWS ECR, AWS Beanstalk, GitHub Actions, MySQL, Git, JPA.**

Music Subscription Website using Serverless Backend.

- A web application where users can search for songs, create accounts, and subscribe to artists, backed by a serverless architecture.
- Leveraged ReactJS with TypeScript for frontend development, incorporating Bootstrap and Tailwind CSS.
- Engineered a serverless backend via AWS Lambda functions, integrating REST APIs through AWS API Gateway for seamless frontend-backend communication.
- Stored user and music data efficiently using AWS DynamoDB.
- Achieved a comprehensive understanding and proficiency in various AWS services.
- **Tools and languages used: ReactJS, Apache Web Server, AWS (S3, EC2, Lambda, DynamoDB)**

Volunteering

Website Administrator

Feb 2024 – Jul 2024

RMIT Information Security Collective (RISC)

- Collaborated closely with fellow club members to gather requirements and craft a polished club website, showcasing attention to detail.
- Built and deployed a responsive Next.js website for RISC.
- Supported with organising club activities and events.

Team Member

Mar 2024 – Jul 2024

RMIT Google Developer Student Clubs (GDSC)

- Collaborate with team members to plan, organise, and execute various events aimed at individuals with varying levels of technical expertise.
- Foster a culture of mutual support and encouragement by providing guidance and mentorship to peers, promoting teamwork and collaboration.
